a. Includes self-assessments and board assessments against companies licensed to write insurance on California risks.

b. Includes only annual premiums tax assessments showing tax liability and ocean marine assessments.

c. Includes retaliatory assessments (except for the period from 1945, when the retaliatory tax law was repealed, through 1959 when the law was reestablished), penalties for late or nonfiling of returns, and adjustments of prior year taxes.

d. Includes penalties for late filing or nonfiling of returns. By constitutional amendment adopted in 1930, ocean marine insurance was removed from the scope of the gross premiums tax and subjected to 5 percent tax on underwriting profits.

e. Defined in footnote b. In addition, there were 48 retaliatory tax assessments and 740 returns that showed no tax liability of which 268 were for life, fire and casualty, and title insurers and 472 for ocean marine insurers.

f. Refunds granted as a result of court judgments on "Mini-Met" type assessments in the amount of \$44,907,977 in 1994 and \$148,828,823 in 1995 have been deducted. Petition cancellations on "Mini-Met" type assessments amounting to \$33,204,784 in 1994 were also deducted.

g. Includes \$43,872,613 in 1984 and \$50,262,105 in 1985 assessed against claim payments made under "Mini-Met" type minimum premium payment group health and welfare plans. The State Supreme Court found these payments to be subject to the gross premiums tax.

h. Refunds granted by court decision in the amount of \$31,299,011 for the principal office deduction for the year 1976 have been deducted.

i. This tax credit on the home or principal office in California was eliminated by proposition 6 which was approved by the voters on June 8, 1976; see Chapter 938, Statutes of 1975.

j. The tax rate was reduced from 2.35 percent to 2.33 percent in 1965. The rate was again raised to 2.35 percent in 1969.

k. Excludes \$22,859,004, which represents the prepayments the companies assessed themselves, computed at the rate of 2.33 percent on the premiums written in the first quarter of 1964.

l. Beginning in 1957, life insurance companies writing disability insurance were assessed only once. In all prior years such companies were assessed twice; one assessment covered their life insurance and annuity policies, and one covered their disability insurance business. In 1956 there were 93 such companies.

m. Beginning in 1952, the State Compensation Insurance Fund became subject to assessment by the Board.

n. The tax rate declined by .05 percent per year from 2.60 percent in 1943 to 2.35 percent in 1948. The decrease was intended to compensate for a gradual restriction of the real estate tax offset privilege. In the 1944 assessment, the maximum offset for taxes on real estate other than the principal office in the state was 75 percent of the company's 1940 offset on such property. The next year it was 55 percent; the next, 35 percent; then 15 percent. From 1948 on, only taxes on principal offices have been eligible for offset.

o. The gross premium tax was first enacted in 1911 at a rate of 1.50 percent on premiums collected in 1910. The rate was raised to 1.75 percent in 1913 and 2.00 percent in 1915.
